

**BOILER TUBE COMPANY
OF AMERICA**

RILEY POWER INC.

Large Inventory of Straight Tubes Available

OVERVIEW

Boiler Tube Company of America (BTA) and Riley Power Inc. (RPI), members of the Babcock Power Services Group, jointly maintain one of the largest and most extensive tube inventories in the USA. Included is a wide array of types, sizes, and wall thicknesses, both seamless and welded construction, commonly used in boilers. Inventory is stored in several key locations throughout the USA to insure prompt delivery.

FEATURES / BENEFITS

Large inventory available

- Many tube sizes, wall thicknesses and materials available including:
 - SA-178 Welded Low Carbon and Manganese Steel for Grade A and Grade C for boiler tube replacements.

- SA-179 Seamless Cold Drawn Low Carbon Steel for tubular heat exchanger and condenser tube replacements.
- SA-214 Welded Carbon Steel for heat exchanger and condenser tube replacements.
- SA-192 Seamless Low Carbon and Manganese Steel for boiler tube replacements.
- SA-210 Seamless Medium Carbon and Manganese Steel Grade A1 and Grade C for boiler tube replacements.
- SA-209 T1 & T1A Seamless Carbon Molybdenum Alloy Steel for boiler tube replacements.
- SA-213 Seamless Ferritic and Austenitic Steel Grades (T2, T11, T12, T22, T5, T9, T91, TP304H, TP309H, TP310H, TP316H, TP321H, TP347H), for boiler tube replacements.

Inventory available on-line

- Access by going to <http://bi.babcockpower.com> (User Name is "guest" and Password is "babcockpower") to see quantities and availability.
- If we don't have the desired tubing in stock, we can often obtain it faster than other sources due to our ongoing relationships with leading tube mills.

Order 24/7/365

- Call 1-800-845-3052 for normal or emergency situations to talk to a fully trained representative.
- Someone is always available to respond.

In-house manufacturing capability to bend requested tubes

- Save time and money by eliminating the need to ship to a fabrication shop.

Vast experience solving many different types of problems on all types of steam generators in many different industries

- Can often recommend alternate materials or a redesigned configuration to resolve an existing problem more efficiently.
