TEi CONSTRUCTION SERVICES

TEi Construction Services, Inc., is a market leader in providing direct-hire, on-site construction services for the installation, repair, alteration, and maintenance of boilers and boiler-related equipment.

Our clients are in a wide variety of industries, including power generation, petrochemical, chemical, steel, pulp & paper, refuse, and industrial processing. TEi has adopted an integrated management approach for all projects, whether turn-key or labor-only. This provides for very effective coordination of all facets of every project, including planning and procurement, tooling, fabrication, installation, and commissioning.

Our commitment to safety, quality, on-time completion, and overall customer satisfaction is unparalleled in the industry.

Types of Equipment Serviced and Installed:

- Boilers
- Pressure parts
- Burners/stokers
- Piping
- Insulation/lagging
- Scrubbers
- Precipitators
- Ductwork/casing/hoppers
- Steel/walkways
- Air heaters (regenerative and tubular)
- Evaporators
- Fans/pumps
- Conveyors
- Feedwater heaters
- Condensers

Overhauls and Shutdowns

TEi Construction Services, Inc., is the number one choice for overhauls and shutdown services, to ensure that clients' projects are done safely, efficiently, and properly while minimizing downtime. We specialize in maintaining stringent project control that results in maximized client satisfaction.

"There was a tremendous amount of work to be accomplished, in a short period of time: fifteen days. Frankly, I felt it was impossible to do the scope of work, in a timeframe, with the size of crew; but they proved me wrong."

—Foreman/CWI for a West Coast power generator

Long Term Maintenance

TEi Construction Services, Inc., has extensive experience in plant maintenance throughout many industries. We provide on-site crews either full-time or on an emergency basis, whether stand-alone, or supplemental to an existing maintenance crew.

Partnering with clients allows us to work directly with their maintenance personnel in meeting long-term maintenance goals, while helping them achieve reductions in plant downtime and unplanned shutdowns.

"The plant leadership was so impressed that the entire crew was given a 'Shining Through Award.' Our company appreciates good work and we look forward to future contracts."

—Maintenance Manager for a Gulf Coast power producer

New Construction

TEi Construction Services, Inc., is your best choice for installation of new equipment. Because of our wide experience base, we can install virtually any type of OEM equipment, including boilers, precipitators, and HRSGs.

This range of knowledge and expertise allows our customers to receive superior installations for a wide range of equipment from a single contractor, with the confidence that their equipment will be installed properly at the outset.

“TEi went beyond our expectations, not only in the work performed, but also in the areas of safety and cleanliness.”

—Maintenance Supervisor for
a Florida municipality
