

**Babcock Power**  
SERVICES

a Babcock Power Inc. company

## COMPANY OVERVIEW

**Babcock Power Services Inc.**, a Babcock Power Inc.® company, is a leading supplier of technology, equipment and engineering services for upgrading and maintaining fossil-fired steam generating plants.

Babcock Power Services draws upon the strengths of a group of established companies, including the boiler OEM Riley Power Inc., Boiler Tube Company of America, TEiC Construction Services Inc., and TEiC Heat Exchanger Services. Our goal is to be your single source supplier for all of your boiler and ancillary-related equipment needs.

### A FULL RANGE OF PRODUCTS

An extensive portfolio of products is available, including natural circulation steam generators for new utility and waste-to-energy plants, to aftermarket replacement pressure parts for any manufacturer's boiler. We provide low-NO<sub>x</sub> burners for all types of fuels, pulverizers, and solid fuel-burning grates. A large inventory of straight tubing is available 24/7/365 to ensure that we can meet your schedule requirements.

### ON-SITE CONSTRUCTION

Babcock Power Services also has the capability of providing on-site construction, for the installation, repair, alteration and maintenance of boilers and boiler-related equipment.

## **FACILITIES LOCATED WHERE NEEDED ... FULL SERVICE CAPABILITIES AVAILABLE**

Our numerous manufacturing facilities and service centers are located throughout the USA and maintain the appropriate ASME stamps required to comply with the latest codes, including ISO 9001 certification. We have over 90 years of engineering expertise and technology through extensive experience with all types of boilers and boiler-related equipment, as well as through license agreements with leading companies in Europe. Such engineering expertise allows us to provide full condition assessments and evaluations, metallurgical analysis, startup and commissioning services, full-scope upgrades, and a layered program to reduce NO<sub>x</sub> emissions for any existing boiler whether wall or tangentially fired. To assist us in evaluating a wide range of issues associated with steam generators and combustion systems, we have developed our own in-house Computational Fluid Dynamics capabilities.

## **TOTAL CAPABILITY**

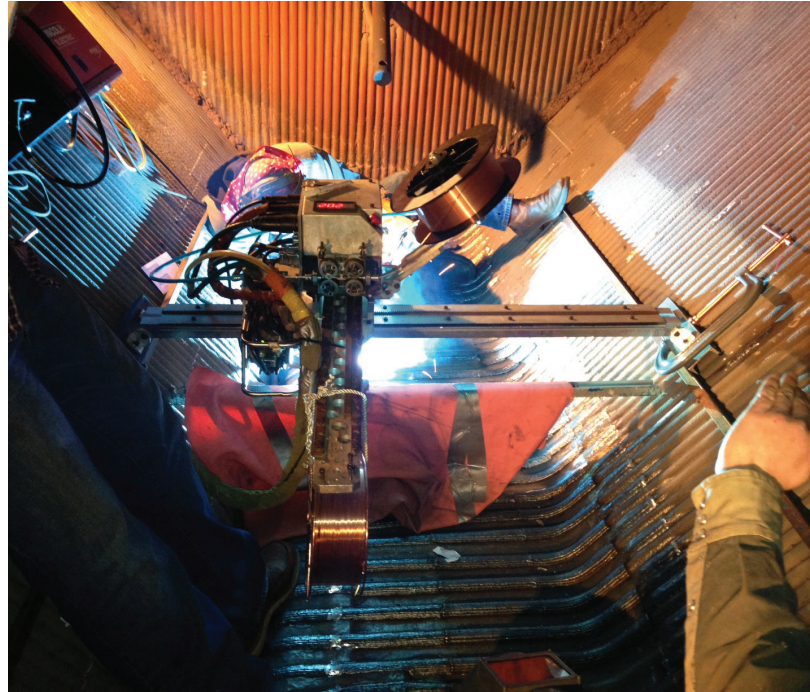

Babcock Power Services has the total engineering, manufacturing, and construction capabilities and a legacy of experience that qualifies us to be your single source solutions provider for all your boiler and boiler-related equipment and services needs.

- Engineered Products
- Replacement Parts
- Manufacturing Facilities & Service Centers
- Construction
- Boiler Rebuilds
- Maintenance Services
- Commissioning and Start-up
- Inventory Management
