

BREATHE EASIER

WITH TECHNOLOGY FROM
BABCOCK POWER ENVIRONMENTAL

Through a collaboration agreement between Bharat Heavy Electricals Limited (BHEL) and Babcock Power Environmental Inc. (BPE), state-of-the-art technology and air pollution control products are now powering toward cleaner air in India's future.

With over 48,000 MW of SCRs in operation in the US, the largest share installed in the market, Babcock Power Environmental brings over 30 years as the undisputed leader, in innovation and NOx control expertise in the power industry.

With BHEL's equipment accounting for 60% of the power generated in India, BPE is proud to partner with them to help provide effective emissions reduction to the people in India.
